

NZASE Science Network of Expertise

... growing and developing existing and new curriculum, teaching and learning networks.

Science network of Expertise Programme Workshop - **Hamilton**

Description

Participation in this programme will provide you with the chance to connect teachers of science in years 1 - 10 and provide the opportunity for you to share and collaborate.

Content

The workshop will involve your active participation with other teachers around:

- Science in the New Zealand Curriculum
- Looking at key research and evidence to support your science teaching and learning
- Understanding how science capabilities can be developed in our students
- Recognising progression in science
- Developing and growing a robust network of science teachers

Active participation

You will be actively engaged in the workshop with other teachers to discuss science teaching and learning - we will give you the opportunity to try some science learning activities and discuss how you might adapt these to suit you and your students. We'll also discuss some student artefacts/work to look for evidence of the knowledge, understanding and dispositions that we need to develop in science. And, we'll discuss how you might continue to collaborate with others in your region, and with teachers in other regions, after the workshop.

Suitable for

- Teachers of science for students in years 1 – 10
 - ❖ ***we encourage all teachers of students from yrs 1-10 who teach science to attend - regardless of experience or levels taught.***
